Concentration: Finance

GPA: 3.926

Relevant courses: Introduction to Databases, Intermediate programming with Python, Financial Management, Object Oriented Design, Algorithms, Natural Language Processing, Calculus 3

PROFESSIONAL EXPERIENCE

TAMID At Northeastern

Boston, MA

Full-Stack Lead Software Developer, Project TaNews

Jan 2025 - Present

- Developing a Full-stack in-house news platform utilizing MySQL, Docker, React.js, Flask, and JSON Web Tokens
- Managed and collaborated with a team of 4 to deliver a scalable and usable platform, while securing data with hashing

Oasis: Project Development Studio

Boston, MA

Full-Stack Developer, Project NUtrition [[GitHub](#)] [[Deployment Link](#)]

Jan 2025 - April 2025

- Created a macronutrient tracker for the Northeastern dining halls, aiming to help provide users with insights about their meals
- Used Selenium.py for web scraping, Supabase, React.js, TypeScript and Flask to make a RESTful API, with OAuth
- Focusing on intentional design to create a self-sustaining web application which can be used by 1000+ users daily

Forge: Product Development studio

Boston, MA

Lead Software Engineer, Team BackBuddy [[GitHub](#)]

Sep 2024 - Present

- Building an app-integrated Arduino product which corrects users' posture with air valves, when put on any chair
- Built an app with React Native Expo which connects to hardware using Bluetooth Low Energy communication protocol

The Modern Data Company

Remote

Marketing and Data Intern

Jun 2023 - Aug 2023

- Generated leads by automating data scraping from LinkedIn, using it to conduct market research and best market the product
- Helped with the hosting of webinars with 300+ industry professionals and leaders, and aided the creation of Data Platforms and pipelines

PROJECTS

HackVerseAI: AI Project Help for Students to Maximize Learning [[GitHub](#)] [[Beta Deployment Link](#)]

March 2025 - Present

- Utilizing FastAPI and NextJS to create a SEO friendly startup which helps students build projects with intentional AI use
- Using LangChain, CrewAI, RAG, ChromaDB, and WebSockets to build a real-time interactivity to support group projects

Car2Drvr: Second Hand car market software solution [[Deployment link](#)]

Jan 2025

- Implemented a full stack web application with React.js, Express, Node, and React-router-dom over a Hackathon
- Used OpenAI API, public vehicle databases, and Google Cloud Vision API to implement AI features
- Learned dynamic routing, API design and testing, form handling, and using new technologies such as PrimeReact

MindMapr: AI-powered Study Tool [[GitHub](#)] [[Youtube Demo](#)]

Jan 2025 - March 2025

- Developed an EdTech web app that automatically transforms user input notes into interactive mindmaps, facilitating learning
- Integrated a React.js frontend and Node.js backend, enabling seamless data synchronization and operations with MongoDB
- Working with OpenAI API and react-flow-renderer, Dagre, Firebase Auth, Primereact, Express js and Docker, and MongoDB

LEADERSHIP AND SERVICE EXPERIENCE

Boy With A Ball

Boston, MA

Volunteer

Sep 2024 - Present

- Volunteer weekly empowering youth to identify community pain points and develop solutions for at-risk neighborhoods.
- Developing further framework for change, such as aiding the development of tutoring programs and building better routes

Junior Achievement Entrepreneurship Club SAS

Singapore, SG

Co-founder & President

Aug 2021 - May 2024

- Created an entrepreneurial organization to teach high school students applied business skills and entrepreneurship, recruited more than 100 students over 3 years, and achieved national recognition 3 times (JA entrepreneurship competitions)
- Mentored students to start 3+ profitable companies in eco-tech and sustainability, guided them to the national stage

BeAwair Technology solutions

Singapore, SG

Co-Founder & App Manager

Sep 2022 - May 2024

- Co-developed a mobile application in Dart through Flutter, designed to provide users insights into their AC energy usage
- Empowered users to monitor and potentially reduce their AC usage, winning JA Company of the Year award
